

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-7 (Canceled).

Claim 8 (Currently amended): An electroluminescence device which comprises:
a cathode,
an anode and
an organic thin film layer comprising at least one layer comprising a light emitting
layer and disposed between the cathode and the anode,
wherein
the light emitting layer comprises a light emitting material comprising at least one
anthracene derivative represented by general formula (2)

wherein Ar is a condensed aromatic group selected from the group consisting of 1-naphthyl group, 2-naphthyl group, 1-anthryl group, 2-anthryl group, 1-phenanthryl group, 2-phenanthryl group, 3-phenanthryl group, 4-phenanthryl group, 1-naphthacenyl group, 2-naphthacenyl group, 9-naphthacenyl group, 1-pyrenyl group, 2-pyrenyl group, 4-pyrenyl group and fluoranthenyl group, each being optionally substituted;

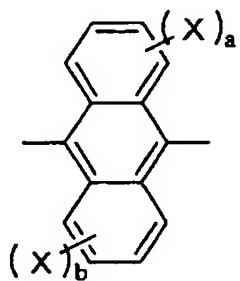

Ar' is an aromatic group selected from the group consisting of a 1-naphthyl group, a 2-naphthyl group, a 1-anthryl group, a 2-anthryl group, a 1-phenanthryl group, a 2-

phenanthryl group, a 3-phenanthryl group, a 4-phenanthryl group, a 1-naphthacenyl group, a 2-naphthacenyl group, a 9-naphthacenyl group, a 1-pyrenyl group, a 2-pyrenyl group, a 4-pyrenyl group and a fluoranthenyl group, each being optionally substituted:

X represents a hydrogen or an aromatic group having 6 to 50 nuclear carbon atoms;

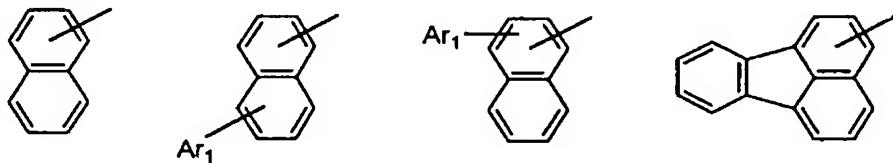

a and b each represent an integer of 0 to 4; and

n represents an integer of 1 to 3 and, when n represents 2 or 3, two or three groups represented by:

may be the same with or different from each other.

Claim 9 (Previously presented): The electroluminescence device according to claim 8, wherein the group represented by Ar in general formula (2) is a group selected from groups represented by following general formulae

wherein Ar₁ represents a substituted or unsubstituted aromatic group having 6 to 50 nuclear carbon atoms.

Claim 10 (Canceled).

Claim 11 (Previously presented): The electroluminescence device according to claim 8, wherein the light emitting layer further comprises an arylamine compound.

Claim 12 (Previously presented): The electroluminescence device according to claim 8, wherein the light emitting layer further comprises a styrylamine compound.

Claims 13-16 (Canceled).

Claim 17 (Previously presented): The electroluminescence device according to claim 8, wherein X is hydrogen.

Claim 18 (Previously presented): The electroluminescence device according to claim 8, wherein n is 1.

Claim 19 (Previously presented): The electroluminescence device according to claim 8, wherein X is hydrogen and n is 1.
